

MANOA NEIGHBORHOOD BOARD NO. 7

c/o NEIGHBORHOOD COMMISSION • 530 SOUTH KING STREET ROOM 406 • HONOLULU, HAWAII, 96813
PHONE (808) 527-5749 • FAX (808) 527-5760 • INTERNET: <http://www.honolulu.gov>

MINUTES OF REGULAR MEETING WEDNESDAY, AUGUST 2, 2006 NOELANI ELEMENTARY SCHOOL CAFETERIA

CALL TO ORDER: Chair Nishioka called the meeting to order at 7:04 p.m. with 10 members present.

MEMBERS PRESENT: Brandon Mitsuda, George Nakano, Nadine Nishioka, Hank Chapin, Paul Holtrop, Salvatore Lanzilotti, Rose Niimoto, Jim Harwood, Brian Kessler (arrived at 8:15 p.m.), Gary Andersen, Dwight Jackson, and Susan Hough (appointed at the meeting).

MEMBERS ABSENT: Jeff McNeill, Chris Niemzyck, Chuck Pearson, Milton Ragsdale, and Taylor Rock.

GUESTS: Hubert Minn (Mayor's Representative); Poni Daines (Senator Taniguchi's Office staff); Representative Brian Taniguchi; Councilmember Ann Kobayashi; Jim Manke (University of Hawaii Manoa); Lt. Delima, Sgt. Mattox, Officer Fetter, and Officer Hendricks (Honolulu Police Department); Linda Day and Aaron Hebshi (UH office of Sustainability); Cindy Ramirez, Christal Collins (Manoa Public Library); Tom Heinrich, Bob Farrell and Ivonne Cardenas (Makakilo.com); Pat Lee (Consultant for Honolulu Alternative Mass Transit); Bryan Mick (Neighborhood Commission Office staff).

RULES FOR CONDUCT: The Chair reminded everyone that there was a three minute time limit for all speakers on any one topic, and added that Mitsuda had a timer which would be employed if people started to ignore that time limit.

PUBLIC SAFETY INPUT:

HONOLULU FIRE DEPARTMENT (HFD) – The representatives from HFD were out on a call and unavailable.

HONOLULU POLICE DEPARTMENT (HPD) – Lt. Delima distributed a handout of monthly statistics for July and highlighted the following:

- 1) For the month of July, the amounts of thefts, burglaries, and unlawful entry into motor vehicles (UEMV) were constant or decreased in beats 750 and 751, while slight increases were registered in beat 752.
- 2) The District 7 East Honolulu Narcotics/Vice Division received nine new complaints while three prior complaints were closed.
- 3) There were no gambling complaints.
- 4) Tip of the month – Protect yourself from telephone fraud, read the tips on the available handout.
- 5) The beach task force covers the area from Diamond Head to Makapuu. They arrested one person on a felony charge, one for open lewdness, six on misdemeanor charges and ten

on outstanding warrant charges. They issued 43 citations for liquor violations, 1 for illegally camping, 1 for illegal fireworks, 1 dog in the park, and 127 parking violation citations.

Questions, answers, and comments:

- 1) Mitsuda inquired how many officers are on patrol in the valley at any one time. Delima responded one officer per beat, so about three in the valley.
- 2) Mitsuda said that residents had wondered where the speed traps are normally located in the valley. Delima responded that they are usually on the main roads where the bulk of the speeding occurs, such as Manoa Road and Woodlawn Drive, and it is hard to do traps on smaller side streets. Mitsuda further inquired if a lot of citations for speeding tend to be given out. Delima observed that once word gets out that speed traps are in effect, the amount of citations approaches zero. He added that morning and evening rush hour is the time when most speeding happens.
- 3) Audience member Heinrich expressed his appreciation to HPD's District Sevens leadership, especially in regards to getting the graffiti wall on Manoa Road painted over. He also thanked the officers who came with Police Chief Boisse Correa to the recent community meeting held at Kalani High School where graffiti was discussed among other things.
- 4) The Chair thanked HPD for putting up the speed trailer as requested.
- 5) The Chair inquired if 911 dispatchers are civilians or officers. Delima clarified that they are civilians. The Chair explained she was asking because a friend of hers was contemplating transporting children in the back of a pick-up truck. But neither of them was sure what the minimum age for riding in the back of a truck was. The Chair therefore placed a non-emergency call to 911 to try and find out the answer. The dispatcher put her on hold for a brief period, and then told her that the dispatchers don't know the law, they only handle calls. Delima responded that at least the dispatcher was honest, but they could have consulted with the lieutenant on duty. He observed that most dispatcher are familiar with the basic laws they deal with all the time, such as what's an assault versus a burglary, but this question was a little more uncommon in nature.
- 6) The Chair commented that the residents appreciate that on weekends, officers give a warning rather than issuing citations to people who have parked illegally on the grass at the District Park, giving them a chance to move their cars.

The Chair mentioned that Board member Pearson had called her and said he would be out of town tonight. Member Niemzyck also communicated that he would be unable to attend prior to the meeting.

FILLING OF BOARD VACANCY IN DISTRICT IV - The Chair asked if there was any residents of District IV in attendance tonight who wanted to serve on the board. Susan Hough indicated that she was. Hough said she has a BA in International Studies and two young children who attend Noelani Elementary School.

Harwood moved that the Board appoint Susan Hough to the vacancy in subdistrict IV; Mitsuda seconded the motion. The vote was unanimous, 10-0-0. (Aye: Mitsuda, Nakano, Nishioka, Chapin, Holtrop, Lanzilotti, Niimoto, Harwood, Andersen, Jackson.)

The Chair called a short recess to allow Mick from the Neighborhood office to administer the oath of office at 7:18 p.m.

The Chair called the meeting back to order at 7:20 p.m. and announced the Board was now full.

COMMUNITY INPUT:

UNIVERSITY OF HAWAII – Jim Manke reported the following:

- 1) The big summer event at the University was the demolition of Frear Hall and the construction of what will hopefully be a signature dorm building. It will be 2 12-story towers with 810 beds. The proposal still has to go in front of City Council on August 16 for certain permit approvals. The University will be required to do a parking analysis and make that part of the five-year master plan. This analysis will include a comprehensive study of parking supply and demand, and consider impacts on students, faculty, and staff. A presentation on this is planned for the September Board meeting.
- 2) The Fall session will be starting up on August 21, before the next board meeting. In anticipation of the annual problem that occurs with U.H. students parking in Manoa valley, 600-700 flyers were printed up and are available at tonight's meeting. These can be distributed to Manoa residents, who can then place them on vehicular windshields. The cards read, "This is a friendly reminder. Parking in the Manoa neighborhood is a privilege we cannot afford to lose. The University has endeavored to maintain a good relationship with its neighbors to insure Manoa streets remain open for student parking. You are our ambassadors to the community; please remember to park responsibly. Stay at least four feet away from any driveway, and do not block any bus stop or trash can when parking your vehicle. Parking in an illegal manner will not only upset our neighbors but may cost you a citation. Thank you for your consideration. Denise Konan, Interim Chancellor, University of Hawaii at Manoa." A parking problem hotline is also being set up.

Questions, answers, and comments:

- 1) Andersen pointed out that the previous traffic study presented to the Board was based on 400 additional beds, not 800. He would like to review that study, and Manke promised to track a copy down.
- 2) Niimoto asked if they could be given copies of the flyers. Manke replied there was a stack of 700 available.
- 3) The Chair asked about the remnants from the UH Lab School fire. Manke said that the hope was to have it removed by the start of the session, but that may not happen. The Environmental Health and Safety Office took test samples from several areas and found lead to be present, however, no asbestos was found. The insurance companies want to conduct their own tests on the materials, drawing out the process. The decision has not been made if the debris can be placed in the landfill or if it needs to be packed and shipped off as hazardous waste. For now, large storage containers have been brought in that can store materials.
- 4) Manke commented that a benefit concert for UH Lab school will be held on August 19 in Andrews Amphitheater starting at 4:00 p.m. Many of Hawaii's top entertainers are

donating their time to this event. Tickets are available at the multi purpose building this Saturday.

COUNCILMEMBER KOBAYASHI – Councilmember Kobayashi gave the following report:

- 1) She was glad to hear UH would be setting up a parking problem hotline for residents around the University area. The Council has already had hearings on the Freer Hall proposal. She mentioned that Diamond Head/Kapahulu/St. Louis Heights Neighborhood Board #5 is also very concerned with the impact the new dorm will have on parking.
- 2) Representative Caldwell and Senator Taniguchi have met and are working with the councilmember to monitor the flood money from the Federal government.
- 3) The City's Department of Facility Maintenance (DFM) will dredge Makiki Stream in the near future.
- 4) A meeting will hopefully be set up soon to discuss stream jurisdiction, which is often fragmented between various entities along a stream's path.
- 5) A final report on mass transit options should be coming out soon as the City Council must make its choice for the preferred alternative by December of this year. If it's a train that connects to UH, it might have to go over the freeway at a height of 60-70 feet. It would also be wide due to escalators and stairs. That section may be controversial.

Questions, answers, and comments:

- 1) Harwood commented that he could think of some alternatives to sending the train over the freeway at such a great height. For instance, it could go under the freeway. Or it could stop at Moiliili and shuttles could run from there to the University. Councilmember Kobayashi responded that engineers have previously said the land in that area is full of caverns, which makes it hard to build the route under the freeway. She added that the University officials have come out against the shuttle option. Jim Shon had suggested raising the freeway and running the train under that at ground level. Harwood replied that if engineers can build a tunnel from the England to France, they certainly could figure this one out. Manke interjected that Denise Konan, interim chancellor of the University of Hawaii at Manoa, has sent a letter to Melvin Kaku, the City's Director of the Department of Transportation Services, saying that the current route eats up too much of the athletic complex, and they suggest putting it at Varsity Place instead which would eliminate the need for an overpass. He thought the Councilmember was copied on the letter. Kobayashi explained that mail can move slowly at Honolulu Hale. Lanzilotti commented that he has been watching transit projects for many years. He added that rail is accepted on the mainland, but people here still see it as a scar on the view plane. Although the cost will go up, perhaps segments of it need to be placed underground for the sake of the island. He asked if it is a done deal. Kobayashi replied nothing is a done deal, and another public meeting will be held very soon.
- 2) Audience member Heinrich asked about an article in the Advertiser that said University Avenue was scheduled for complete repaving. Is any more information available about this? Kobayashi replied she knew that a large project is coming that will also include Maile Way and Vancouver among other streets.

- 3) The Chair expressed her thanks for the filling of the potholes on Lowery Avenue right after last month's meeting. Unfortunately, there are new ones along Woodlawn Drive. Kobayashi added that she has asked DFM to look at doing total repaving of some of the major roads in Manoa.
- 4) Lanzilotti expressed his concern over the policy to have elected officials report to the Board on a rotating quarterly basis. At a minimum, the Mayor and the Councilmembers should have monthly reports since the Board is a City entity. The Chair pointed out that they are always welcome to come to the Board meeting to give a report. She agreed that the Board could debate the policy at a later date.

MAYOR'S REPRESENTATIVE—Hubert Minn, Special Advisor, Customer Services Department (CSD), distributed Mayor Hannemann's newsletter and mentioned the following:

- 1) An update of the City's green waste program is available tonight, as well as a cheat sheet for CSD that lists important phone numbers and interesting facts.
- 2) Harwood had previously asked if there was a correlation in the cost and extension of completion date to the work being done on Manoa Valley District Park's parking lot. Minn reported there was, and testing had shown the subgrade conditions to be worse than initially thought. The project is scheduled to be done in two weeks, but the lights will not be in place for a little while longer.
- 3) Pearson had previously asked about the use of Kamanele Park as a staging area for BWS equipment. Minn reported that the contractor did make a presentation to the Board previously, and in light of the fact that Manoa Valley was long overdue for extensive water line replacements, the contractor was allowed to use the park. The contractor will restore the Park to the same or better condition when the projects are complete.
- 4) Councilmember Kobayashi had requested confirmation that the \$11 million earmarked for the elephant enclosure had been spent. Minn reported that the Department of Enterprise Services (DES) has spent \$10,019,000 for the Zoo's Asian Tropical Forest Facility project on infrastructure improvements and exhibit relocations, and projects another \$10 million is required to finish the project.
- 5) The Chair's inquiry as to why East Manoa Road was repaved before Lowery Avenue will be available at the next meeting.
- 6) Niimoto's inquiry about the potholes and lack of lighting at Manoa Valley District Park is being looked into by the Department of Parks and Recreation and will have a response available at next month's meeting.

Questions, answers, and comments:

- 1) Mitsuda thanked Minn for always following up on his e-mails. He sent one today, detailing a request by Manoa residents to have a traffic study done at the Manoa/East Manoa fork. The idea is to extend the solid line leading up to the fork from the Punahou area in order to prevent cars from suddenly switching lanes. Minn added that this request had been forwarded to HPD and the City Department of Transportation Services for comment. Harwood suggested perhaps a sign could be placed warning motorists of the upcoming fork.

- 2) Andersen asked what exactly the \$10 million had been spent on at the Honolulu Zoo. Minn replied that money went for planning, infrastructure improvements, and relocation of exhibits. Andersen replied that the money had been specifically earmarked for the elephant enclosure, had it not? Minn said he would have to double check on this.
- 3) Andersen commented that he is concerned about the amount of debris choking Ka'ahumanu Brook at the Makai/Ewa end of Manoa Valley District Park and the flood danger it represents. He asked Minn to see if the City can take care of this. He also commented that coqui frogs have invaded Manoa, and that uneven grassy patches in the District Park are causing children to slip and fall down. The Park has also been infested by the pokey weed *Mimosa pudica*, which prevents people from playing in the park barefoot. Minn said he would get responses to these concerns. Audience member Heshbi commented that information about the coqui frogs should be given to the Oahu Invasive Species Committee – they are on the web, and try to eradicate the frogs when they get report of sightings.

The Chair thanked Minn for attending the meeting.

RESIDENTS AND OTHERS: Through an oversight, notice of a presentation by Christal Collins, Librarian for Manoa Library, was not placed on this meeting's Agenda. Therefore, the presentation was made under this section of the Agenda.

MANOA LIBRARY— Christel Collins, Branch Manager for Manoa Library, gave an update on the renovations being done at Manoa library. In January, the Governor released \$6.5 million. The project is currently in its design phase. The library is currently 6500 square feet, making it the second smallest on Oahu. This project will double it, making about the size of the Kalihi library. It will add a children's room, a meeting room, and increased parking. Negotiations with the University are underway as the Institute For Astronomy's property may be used. It's also possible the parking lot may be located under the building. There will be a public meeting in October. The new building will be green in nature and meet Leadership in Energy and Environmental Design (LEED) specifications.

Questions, answers, and comments:

- 1) Mitsuda asked if UH will be holding public meetings other than the one in October for residents to give input on the project. He feels many of them will want to have input into this project. Collins explained that this is a State not a University project and that there will be several public meetings in the near future. The Chair will be notified when the dates are finalized.
- 2) Collins provided her contact information as 988-0459 (phone), 988-0458 (fax), and christel@librarieshawaii.org
- 3) Lanzilotti commented that Manoa has been struggling to get this renovation done for ten years, and the residents have had plenty of input into it. He added it's nice that it is finally coming to fruition.

Member Brian Kessler arrived at 8:15 a.m.

The Board took a short recess to allow the next presenter to set up.

PRESENTATION:

UH MANOA CAMPUS MASTER BIKE PLAN- Aaron Hebshi from the University of Hawaii Office of Sustainability gave a presentation about the Manoa Campus Master Bike Plan. The current draft of the plan is available at <http://www.waikikiskyliner.net/bike>. Every day that UH is in session, an extra 10,000 cars are present in Manoa. U.H. is one of the single biggest destinations for commuters. Councilmember Kobayashi has been a champion of the campus access portion of the plan, some of which has been completed. The parts of the plan that require more political will still need to be done, and everyone's help is required. There are six proposed bicycle routes for campus access, Metcalf, Wilder, Dole, Waialae, Woodlawn, and University. An example of easy elements of the plan is improved curbs and sidewalks. An example of something a bit harder would be the removal of parking from one side of selected streets, such as Woodlawn. An example of hard elements would be to restripe Wilder to eliminate street parking. The other part of the plan is a series of bike paths and bikeways have been proposed for the campus. Andersen asked for the definition of bike paths, bike lanes, and bike routes. Hebshi explained that paths are dedicated areas for bikes separated from the street, lanes are strips on roads, and routes can be either of those or someplace with no features for bikes that are used nonetheless, like the McCully area. When bike paths are shared with pedestrians, the bike must go at walk speed while in the presence of pedestrians. One of the main cornerstones of the plan is to create a central bike hub similar to the KCC one recently dedicated along with nine satellite hubs around campus. These will have increased security at these hubs since bike theft is a major problem on campus. These hubs will have roofs to protect bikes from the sun and rain, better designed racks, and adequate drainage so that mud and puddles do not build up. The central hub and some of the satellite hubs will feature showers. The central hub will cost \$1 million, eighty percent of that from Federal funds. The total cost for all the hubs is \$1.5 million and estimated to take five years to implement.

Questions, answers, and comments:

- 1) Andersen asked how much money the City Council usually appropriates for this project. Hebshi is not sure, but thinks it is in the tens of thousands. Councilmember Kobayashi got \$350,000 in last year's budget, which helped to start some of the campus access projects.
- 2) Harwood suggested that a temporary fix would be to make biking legal again on campus, maybe using cones to separate bikes from pedestrians. Hebshi replied that people bike on campus all the time; security never cites them for doing so. Only citations for parking are written. Pedestrian interaction is the biggest issue. Harwood replied that we shouldn't be advising people to break regulations by biking in unauthorized areas, even if citations are rare.
- 3) Kessler asked if the bike routes are prioritized. Hebshi said they were, and the website has that listed.
- 4) Kessler asked if there were any plans to incorporate user fees into this system so that then people who use it pay for it. Hebshi replied not at this time.

The Board took a short recess to allow the presenter to break down and reconvened at 8:17 p.m.

UNFINISHED BUSINESS:

AUTHORIZATION TO FUND VIDEOTAPING OF BOARD MEETINGS - Andersen noted that in reviewing the minutes, it did not appear the Board had authorized the funding of videotaping, as they should have. Holtrop mentioned that he was looking at the appropriations for the current fiscal year, and the publicity account did not have enough to cover the entire year. The Chair suggested that the Board authorize just two months of videotaping for now, until she can discuss the situation with the Neighborhood Commission Office. **Harwood moved that the board authorize the funding of the next two months of videotaping, Mitsuda seconded.** Andersen called for a point of order, as this item was not listed on the agenda and therefore needed to be added with a two-thirds vote. **Harwood moved to add to the agenda the item of payment for two months worth if videotaping, seconded by Lanzilotti. The vote was unanimous, 12-0-0.** (Aye: Mitsuda, Nakano, Nishioka, Chapin, Holtrop, Hough, Kessler, Lanzilotti, Niimoto, Harwood, Andersen, and Jackson). Cameraman Bob Farrell commented that the motion did not cover this month's meeting. **Harwood amended his motion to include the month of July, Mitsuda seconded. The motion passed unanimous, 12-0-0.** (Aye: Mitsuda, Nakano, Nishioka, Chapin, Holtrop, Hough, Kessler, Lanzilotti, Niimoto, Harwood, Andersen, and Jackson).

NEW BUSINESS:

SELECTION OF BOARD DELEGATE TO UH LONG RANGE DEVELOPMENT PLAN ADVISORY COMMITTEE - Chair Nishioka asked for volunteers to be on a delegate on a board for the University of Hawaii Long Range Development Plan Advisory Committee as requested by Kathy Cutshaw, Interim Vice Chancellor for Administration, Finance and Operations, University of Hawaii. Holtrop and Mitsuda both indicated they were interested in serving in this position. Andersen asked if the planning committee chair was supposed to serve in this role. Harwood explained that this is completely separate from the Board's organization, and the Board can send whomever they please. Kessler said he was also interested in being the delegate to this committee. Audience member Heinrich commented that he was happy the Board has this opportunity. The Long Ranger Development Plan was interrupted and is now back on track. The McCully Neighborhood Board has also been invited to select a delegate. An alternate can also be selected to attend the committee meetings. Andersen observed that the Board selected Kessler as the chair of the planning committee, and therefore he should be the Board representative to UH. Lanzilotti mentioned that the process interests him, and he would like to be the alternate. Harwood responded that this is a great opportunity. Nakano asked for a point of order as to who was running the meeting at this juncture since it seemed the Chair had yielded the gavel. The Chair explained that the letter from UH had been sent to Harwood, therefore she was deferring to him on this matter. Kessler asked if it was known how long the committee foresees they will be in existence and how often they meet. Harwood asked Manke to get the Board this information. The Chair deferred this matter until Manke reports back to the Board.

BOARD ADMINISTRATION AND PLANNING:

TREASURER'S REPORT – Holtrop reported that the new fiscal year had begun in July, and the accounts have been replenished to the tune of \$1520 for Operating, \$1471 for Publicity, and \$120 for Refreshments. July saw expenditures of \$14.19 and \$42.51 for Operating expenses, and \$208.33 for videotaping from the Publicity account.

AMMENDMENT TO MINUTES OF THE MARCH 8, 2006 JOINT MALAMA O MANOA/NEIGHBORHOOD BOARD PLANNING COMMITTING MEETING – The Chair deferred to Harwood. Harwood explained that Pearson had suggested this amendment. On page 4, the minutes read, "the church does not want to sell the land, but the federal government won't

operate on privately owned land. Duane Prebble said a land swap might be acceptable to the Catholic Church.” The proposed amendment would be to insert, “Father Alexander nodded in agreement to this concept, opening the possibility of further progress on the disposition of that property.” Lanzilotti asked if Father Alexander had vocalized his agreement. Harwood replied no. Lanzilotti commented that we should not be interpreting nodding, the Father might have a nervous tic after all, and we cannot possibly interpret body language. Kessler suggested that the amendment instead be to reference an article in the paper, which said the Catholic Church was interested in a land swap. Harwood said that would not be appropriate as the minutes are to reflect what occurred at the meeting. Andersen said he agreed with Lanzilotti, and we should ask for a letter from the Church stating their support of a land swap for inclusion of the next meeting. Nakano asked who is making what motion, as Harwood cannot make the motion and retain the gavel. The chair asked if anyone is making a motion to accept the proposed amendment. As no one made a motion to that effect, action was dropped.

HONOLULU HIGH CAPACITY TRANSIT CORRIDOR PROJECT - Pat Lee reported that at the end of July we had our second round of community meetings and more meetings will be held in the future. The UH overpass was the most controversial part of the previous meetings.

APPROVAL OF MINUTES:

Mitsuda moved and Holtrop seconded the motion to approve the regular meeting minutes from July 5, 2006 with the following corrections:

Page 1 Under ‘Call to Order,’ add “eventually 14 members present.”

Page 1 Move Rose Niimoto’s name from Members Absent to Members Present.

Page 4, item #1 After the word “study”, add “of the 2004 Manoa Flood” to explain what kind of study it was and add “Representative” in front of Caldwell.

Page 5, item #3 After “Kobayashi agreed” add “and mentioned there were technical reasons for the apparent discrepancy.”

Page 5 Spell word “treasurer” correctly.

Page 5, item #1 Insert “a multi-agency forensic” before “study” and add “with the Army Corps of Engineers as the lead agency.” after.

Page 3, item #4 Add “Pearson requested a report on the status of the funds and design on the improvements to both parks.”

Page 4, item #2 Replace with “Chuck Pearson is inquiring why the City has allowed Kamanele Park to be used as a staging area for the stockpiling and storage of materials and debris for BWS’ repair and restoration projects. As a consequence, the community has not been able to use the park.”

Page 5 Delete the “and” after “disbanded” in line 3 of Malama O Manoa and to change line 4 “Paradise Park” to “the Valley.”

The motion passed unanimously, 12-0-0. (Aye: Mitsuda, Nakano, Nishioka, Chapin, Holtrop, Hough, Kessler, Lanzilotti, Niimoto, Harwood, Andersen, and Jackson.)

ANNOUNCEMENTS:

- 1) Niimoto commented a neighbor told her that people overrun the District Park in Manoa on Sundays, most of which are not Manoa residents. She thinks there are too many leagues allowed to use the park, and too much drinking is occurring as well. The Chair added that a softball league starts up next Sunday, and AYSO soccer is on going as well. She thinks Niimoto has valid concerns, but if there is no drinking and people are vacating the park by the time their permits expire she does not think much can be done. Andersen wondered how much of the Park is dedicated for passive use, and added that parking is a problem. The Chair said those concerns need to be addressed to the Department of Parks and Recreation.
- 2) The Chair announced that Noelani School Parent Community Networking Center wants 4-6 parking attendants for their 2006-07 school year. The times can be negotiable for the following dates:

| | | |
|-----------------------|----------------------|-------------------|
| August 17, 2006 | Noelani Open House | 5:30 – 7:00 pm |
| September 19-20, 2006 | Grandparent luncheon | 9:30am – 12:00 pm |
| December 19, 2006 | Song Fest | 5:30 – 7:00 PM |
| May Fair | Very large good fair | 6:30 – 10:30 PM |

If you're interested, please call the school at 988-1853 and ask for Mr. Gary Nakamura.

- 3) Kessler said he was not sure if this was bought up before his arrival, but he wanted to thank all agencies involved in getting the graffiti wall painted over.

ADJOURNMENT: Without objection, the meeting was adjourned at 8:58 p.m.

Submitted by:
Bryan Mick, Neighborhood Commission Office
